

Activity: Wanted: AI Instructions and Task

Students work on this activity in pairs.

Print the picture cards and the answer sheet as many times as needed.

Then, cut out the picture cards.

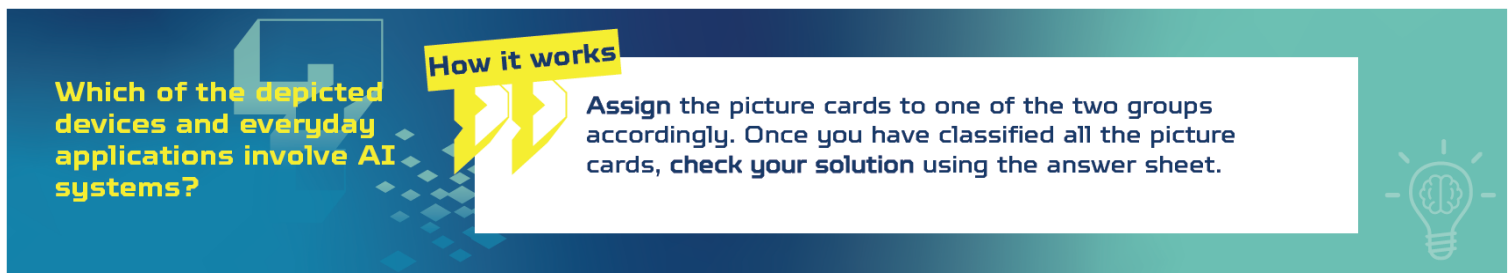

The students complete the following task:

Which of the depicted devices and everyday applications involve AI systems?

Assign the picture cards to one of the two groups accordingly. Once you have classified all the picture cards, check your solution using the answer sheet.

The students' mappings are discussed in the group afterwards. Some applications of AI can be selected for a more detailed analysis of their functionality. More information and explanations are available in the information text on the topic.

Student task as printing template:

Which of the depicted devices and everyday applications involve AI systems?

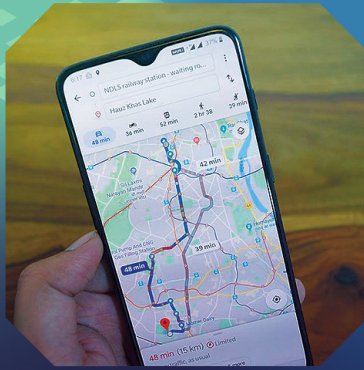

How it works

Assign the picture cards to one of the two groups accordingly. Once you have classified all the picture cards, check your solution using the answer sheet.

Picture Cards

digital assistant

navigation system

mobile phone

streaming platform

music streaming

e-scooter

printer

ATM

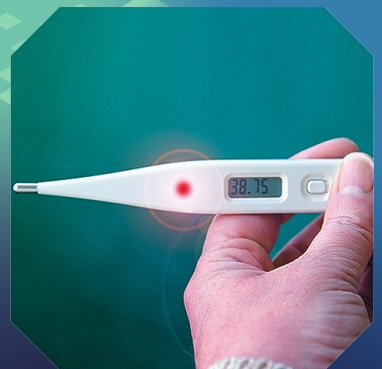

motorised wheelchair

record player

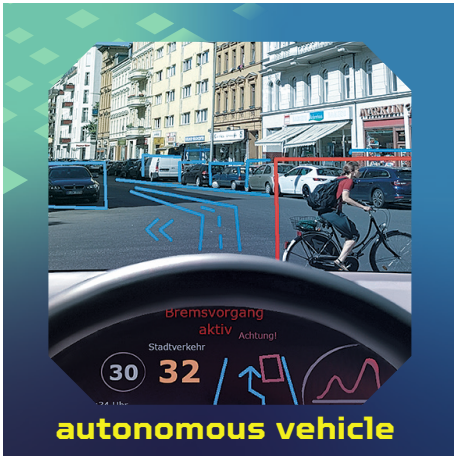

toaster

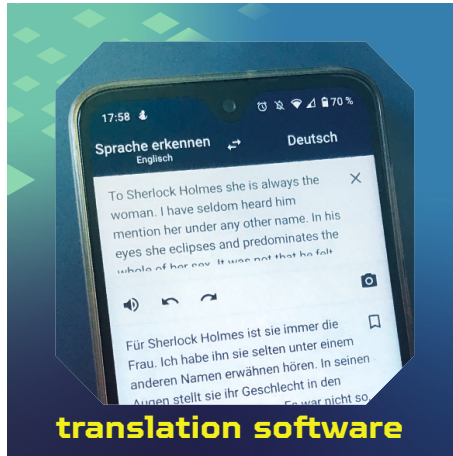

digital thermometer

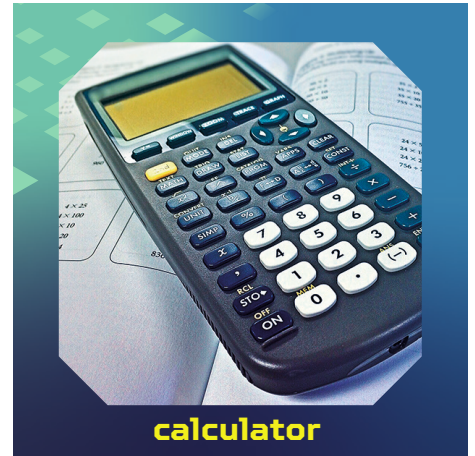

Picture Cards

autonomous vehicle

translation software
